## **2010 Secondary School Robot Programming Competition**

### **Interested in Robots, Computers & Programming?**

The School of Computer Science at the University of Windsor is holding a Secondary School Robot Programming Competition (RPC) this April. All you need to bring is imagination and creativity and we supply the rest.

If you have never been involved in robotics or programming, don't worry, no prior experience is necessary. Training will be provided in two training sessions. If you have previous experience in Lego Mindstorm NXT robots, the first training session is optional.

Assemble a team of 3-4 students and join in on the fun!

Students can gain experience using our Lego Mindstorm NXT Lego robots in one of our computer labs. You also may purchase these kits at B & B School Supplies - [www.bbschoolsupplies.com](http://www.bbschoolsupplies.com)

If you have any additional questions, contact Margaret Garabon Cookson at (519) 253-3000 ext. 3714.

An awards ceremony will be held after the competition. All are welcome. Prizes will be awarded to the winning teams.
